Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 7 and 10, more particularly define the structure and method of assembling of a magneto-optical head which comprises: a transparent substrate; a coil; a pair of first electrodes connected to the coil; an objective lens provided on second surface of the substrate; a flexible printed circuit sheet provided on second surface of the substrate which has an opening for insertion of the lens; a pair of conductor patterns; a pair of second electrodes and a pair of conductive wires for connecting the first and second electrodes. These particulars, combined with remaining claim elements are not suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2627
